EDUCATION

Howard University
B.S. Computer Science

Washington, D.C.
May 2024

EXPERIENCE

Microsoft

July 2024 – Present

Technical Program Manager II – Edge Security/Microsoft Specialized Clouds

- Owned end-to-end product delivery of edge security features across Windows and Linux fleets in cloud/hybrid environments; drove 4M+ device adoption and improved security/compliance outcomes through phased launches and stakeholder alignment
- Led cross-org delivery of Gen2 VM trusted launch (vTPM and Secure Boot) into regulated/air-gapped cloud environments; drove requirements, dependency mapping, and integration readiness across engineering, security/compliance, and operations
- Built and forward-deployed a tool to address a customer feature gap, cutting team ICM queue by 30%, while driving broader AI process automation that doubled documentation throughput and saved 10+ hrs/week
- Built and ran a release-gate validation program including criteria, triage cadence, and closure ownership that resolved ~3 critical issues per feature pre-launch, improving release quality and reducing defect escape
- Co-owned enterprise adoption/evangelism program: created customer advocacy mechanisms, technical content, and led executive briefings to accelerate adoption feedback into roadmap prioritization
- Supported strategy-to-execution for Confidential VM/GPU initiatives by synthesizing market signals, aligning partners/stakeholders, and shaping GTM readiness to support secure AI/enterprise workloads

Microsoft

May 2023 – August 2023

Product Management Intern – Azure Enterprise and OS Security

- Led discovery, requirements, and POC delivery for a GenAI-assisted tool that streamlines creation of custom security baselines for edge device management; clarified user workflows and validated feasibility with stakeholders
- Contributed to product/program strategy by translating market/competitive insights into roadmap opportunities for OS security platform improvements, supported prioritization and narrative for long-term investment
- Accelerated multiple peer intern projects by supplying research on AI integration and security frameworks

Oaktree Capital Management

June 2022 – August 2022

Product Management Intern

- Supported portfolio operations across 20+ investment strategies, coordinating cross-functional analysis and tracking performance metrics to align on strategic priorities
- Led deployment of AWS speech-to-text and voice sentiment analysis system, partnering with stakeholders to define success metrics and deliver automated meeting summarization, improving decision velocity and cross-team visibility

The Office of Barack and Michelle Obama

October 2021 – December 2021

Technology Intern

- Owned implementation and change rollout of cloud speech-to-text transcription integrated into correspondence workflows; delivered 10 hrs/week savings across 3 teams through process redesign and stakeholder training

TECHNICAL SKILLS

Program Management: Cross-functional Leadership, Stakeholder Management, Release Management, Dependency Management, Go-to-Market Planning, Product Strategy, Executive Communication, Risk Management, Agile/Scrum

Languages: Python, C++, Rust, JavaScript, TypeScript, PowerShell, SQL

AI/ML: Generative AI (Claude, GPT, Qwen), LLM API Integration, Prompt Engineering, RAG, Agent Frameworks, Fine-tuning, MLX, Cursor, GitHub Copilot, NLP/Speech-to-Text

Cloud & Infrastructure: Azure (AZ-900 Certified), AWS, Google Cloud Platform

Security & Compliance: Confidential Computing, Zero Trust Architecture, Hardware Root of Trust, PKI

Tools: Jira/Azure DevOps, Git/GitHub
